

TANMAY KHOSLA

Computer Science Engineer | AI & Future Technology | Full-Stack Development
+91 78141 28680 | tanmaykhosla610@gmail.com | github.com/Tanmay610 | linkedin.com/in/tanmay-khosla

SUMMARY

Computer Science Engineering student specialising in AI & Future Technologies, with a strong interest in AI applications, software engineering, and full-stack development. Experienced in building AI-powered web applications, data-driven dashboards, and machine learning models integrated into practical solutions, with project work spanning predictive analytics, AI-powered diagnostic platforms, intelligent service marketplaces, and automation tools. Comfortable with data structures, algorithms, REST APIs, responsive web development, and machine learning fundamentals, with a continued focus on writing scalable, maintainable, user-centric software.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, SQL, Swift, HTML/CSS

Frameworks & Libraries: React, Node.js, Express.js, REST APIs, PyTorch, TensorFlow

Databases: MongoDB, PostgreSQL, SQL Query Design, Data Preprocessing

Machine Learning & AI: Machine Learning, Deep Learning, Feature Engineering, Model Training & Evaluation

Systems & Tools: Data Structures & Algorithms, Git/GitHub, VS Code.

PROJECTS

FIXIT — AI-Powered Home Repair Platform

- Engineering a full-stack web platform that uses AI to diagnose home repair issues and match customers with verified technicians via a fairness-weighted matching algorithm
- Built a responsive frontend in React/JavaScript with a REST API backend in Node.js, handling service requests and technician data
- Designed technician-facing tools for transparent earnings tracking and AI-assisted service request intake

Jarvis — AI Voice Assistant

- Built a voice-controlled personal assistant handling reminders, task automation, and natural-language web search queries, using speech recognition and NLP-based intent parsing for hands-free control
- Developed backend services in Node.js for persisting user tasks and preferences

Smart Traffic Prediction System / Web + iOS

- Built a machine learning pipeline in Python to predict traffic conditions from historical datasets, covering preprocessing, feature engineering, and model training
- Developed a web dashboard for visualizing predictions and a companion iOS app in Swift for real-time on-device interaction

Personal Portfolio & Resume Website

- Designed and built a responsive portfolio site to showcase projects, optimized for performance, accessibility, and mobile responsiveness

ENTREPRENEURSHIP

Founder — TidyTouch (FMCG Cleaning Products Trading)

- Founded and independently operated a B2B trading business sourcing cleaning and FMCG products for bulk distribution to distributors
- Managed end-to-end operations: supplier negotiation, inventory, logistics coordination, and client relationships
- Developed pricing and margin strategy while sourcing directly from manufacturers, gaining practical experience in supply chain operations and B2B sales

EDUCATION

B.E./B.Tech, Computer Science Engineering (AI & Future Tech) / Chitkara University 2024 – 2028 CGPA:

8.7 / 10

EXPERIENCE

International Academic Program / GLOW Summer Program — Bandung, Indonesia

 2025

- Participated in a cross-cultural academic program focused on global learning, technical discussions, and collaborative problem-solving with an international cohort

CERTIFICATIONS

GLOW 2025 Summer Program (Indonesia) • Microsoft Certified • Infosys Springboard • Google Cloud • Cybersecurity Fundamentals • Multiple Hackathon Certificates
